

Application roles

The following roles can be attached in the app:

- User that can add practices as an author, and coordinate and approve practices if chosen as Coordinator and/or Approver by the author of the practice;
- Portal administrator having access to the app settings, appointing the App Moderator, and editing and deleting any practices.
- [App Moderator](#) is appointed by the portal administrator, and can delete, edit and archive any practices
- Coordinator is a user appointed by the author of the practice [to coordinate](#) a practice. Several Coordinators can be appointed. Coordination is completed when a practice is coordinated by each of the users taking part in the coordination process
- Approver is a user appointed by the author of the practice that carries out the [approval](#) of the practice, and adds tasks to a practice.
