

Adding a lesson via Import

When you click on the "Import" element, the lesson import card opens:

The screenshot shows a light blue rounded rectangle containing a document icon and the text "Drag files in .udata or .xlsx format here or click here to select files on disk." Below this is a smaller text line: "To upload lessons, you can use files previously exported in .udata or .xlsx format, the template can be downloaded on the right under the button". At the bottom left is a toggle switch labeled "Publish Immediately" which is currently off. At the bottom right is a button labeled "Download Sample xlsx File for Import".

First, download the template for adding a lesson:

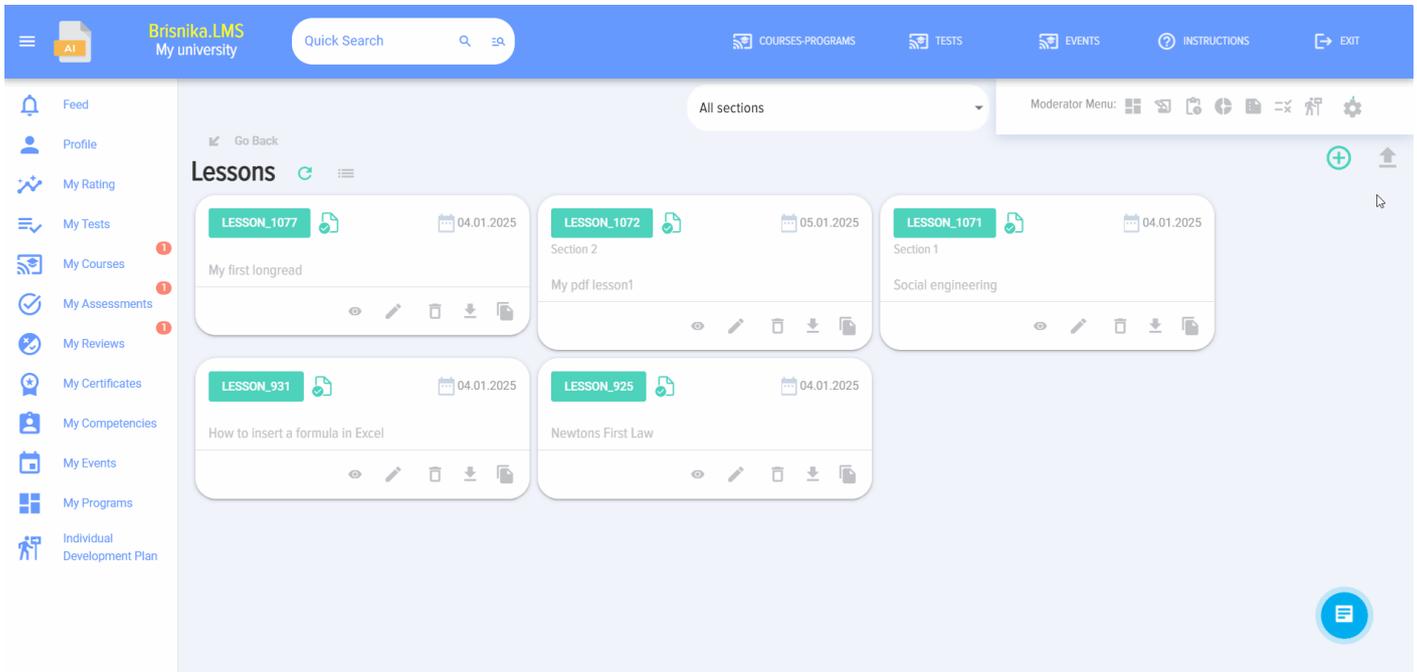

[Download Sample xlsx File for Import](#)

The template looks as follows:

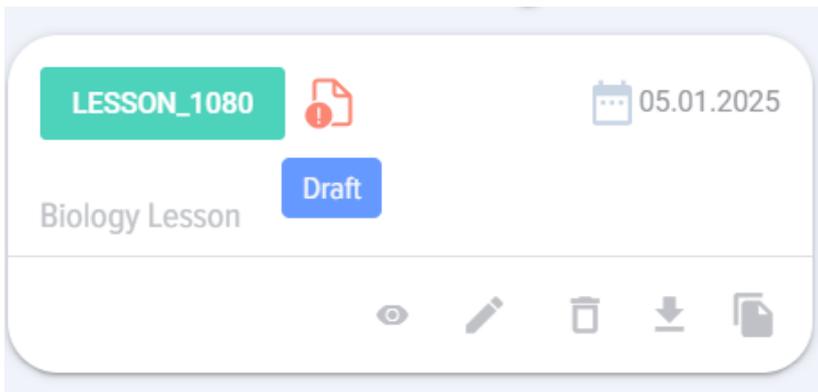

A	B	C	D	E	F	G	H	I	J
#	Template filling out guide								
#	1. The structure of the template cannot be changed.								
#	2. Rows with tags LESSON (grey colored) are not meant for uploading, serve as marks and must not be changed. The 1st column (A) is not meant for uploading and must not be changed.								
#	3. Section containing the lesson description starts with the row tagged as LESSON. Lesson data are in the following row.								
#	4. One file can contain several lessons. To create several lessons, please copy and paste the block LESSON.								
#	5. Import is stopped if several empty rows (more than two) appear. A limit of 1000 rows is set.								
LESSON	Lesson Name	Longread							
	Lesson-1 Import	Longread test							
#	id	URL							
youtube	op_ov3ExaQk	youtu.be							
#	stuff								
files	[[{"I":16474,"N":"1. am, is, are.pdf","A":"Y"},{"I":16								
#	text	link							
link1	link description	https://vimeo.com/123456789							
link2	link description	https://vimeo.com/123456789							
link3	link description	https://vimeo.com/123456789							

It contains detailed instructions for filling it out.

After completing the template, place it in the upload field and click the "Upload" button.

The lesson will appear in the catalog with the status "Draft":

Next, click on the "Edit" element and publish the lesson through the lesson addition card by clicking the "Publish" button.

If necessary, you can make any additional changes to the lesson. You can also add a SCORM course instead of a video.
