

Course import

When you click on the “Import” element, the course import card opens:

Drag and drop files in .udata or .xlsx format here, or click here to select files from the disk.

To upload lessons, you can use files previously exported in .udata or .xlsx format. The template can be downloaded from the button on the right.

It contains detailed instructions on how to fill it out.

After filling out the template, place it in the upload field and click the "Upload" button.

The course will appear in the catalog and will have the status "Draft".

Next, click on the "Edit" element and publish the course through the course adding card by clicking on the "Publish" button.

If necessary, you can make any additional changes to the course.
