

Exporting a lesson

Exporting a lesson is available from the lesson catalog.

Lesson cards in the lesson catalog contain the following elements:

When you click on this element, the lesson will be exported to a file in either Excel or udata format, depending on the export/import template selected in the settings.

The screenshot shows the Brisnika LMS interface. The top navigation bar includes 'Brisnika LMS My university', a search bar, and links for 'COURSES-PROGRAMS', 'TESTS', 'EVENTS', 'INSTRUCTIONS', and 'EXIT'. A left sidebar contains navigation options like 'Feed', 'Profile', 'My Rating', 'My Tests', 'My Courses', 'My Assessments', 'My Reviews', 'My Certificates', 'My Competencies', 'My Events', 'My Programs', and 'Individual Development Plan'. The main content area is titled 'Lessons' and displays a grid of lesson cards. Each card shows a lesson ID (e.g., LESSON_1077), a title (e.g., 'My first longread'), and a date (e.g., 04.01.2025). Below the title and date, there are icons for visibility, editing, deleting, downloading, and printing. The download icon in each card is highlighted with a red square.
