

Hiding the catalog of courses, tests, events

By default, all three items are inactive. When activated, the corresponding catalog will be hidden from all users except moderators. This can be useful, for example, when you do not have tests and events, but only courses.

The screenshot shows a settings panel with a light blue background. It contains three toggle switches, each with a white circle and a grey track. The first toggle is labeled 'Hide Course Catalog', the second 'Hide Test Catalog', and the third 'Hide Events'. All three toggles are currently in the 'off' position. Below the toggles, there is a line of text: 'Catalogs are hidden from all users (except moderators), including administrators.'

Hide Course Catalog ☐

Hide Test Catalog ☐

Hide Events ☐

Catalogs are hidden from all users (except moderators), including administrators.
