

Archiving a lesson

A lesson can be moved to the archive only after approval, including if all tasks for it have been completed or if the status is cancelled.

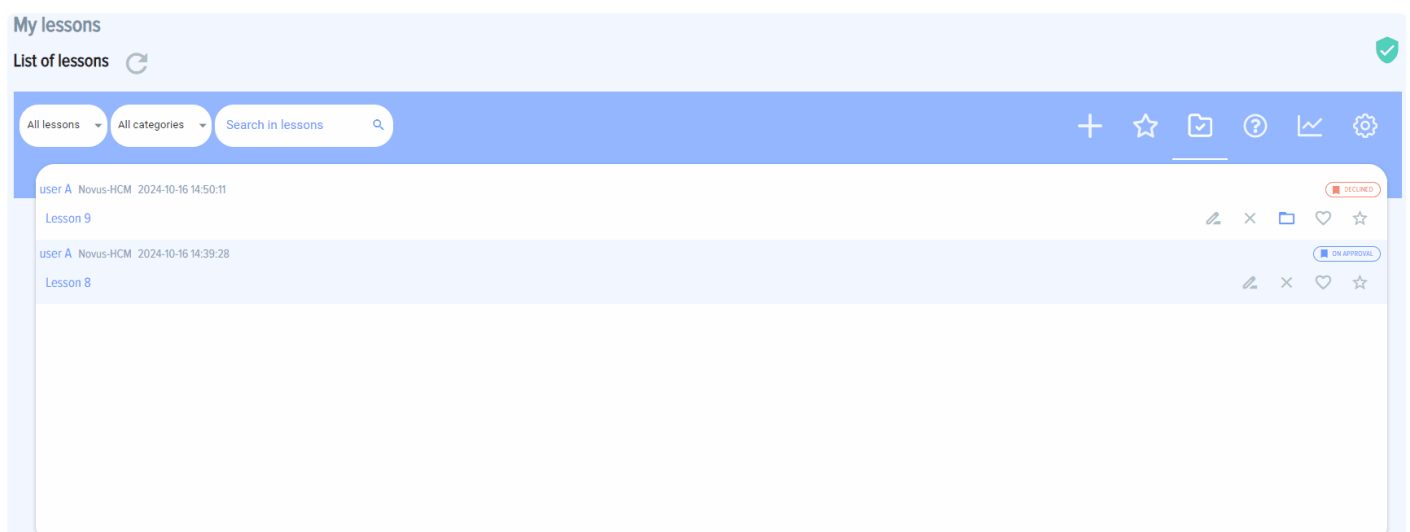

The author of the lesson, the application moderator or the Bitrix24 portal administrator can move the file to the archive.

The corresponding active element “To archive” will appear in the lesson control panel.

When you select "Archive" from the menu, lessons that have been transferred to the archive will be displayed.

To extract a practice from the archive, click the "From archive" button.

Revision #1
