

# Notification System

The author of the lesson gets notifications on Bitrix24 portal on every action with the lesson.

An employee gets notifications as well, if appointed as a coordinator or approver.

When tasks are set, a task performer gets a notification on task assignment.

Notifications are also sent on the appointment and dismissal of app moderators.

The following notifications are replicated in the live feed of your Bitrix24 portal:

- to all, when a lesson is posted (approved);
- to coordinators, when a lesson is passed to “On coordination” stage;
- to an approver, when the lesson is passed to “On approval” stage.

The screenshot displays a Bitrix24 notifications feed with two entries. Each entry features a user profile icon, the text 'user A > user A', the timestamp 'Today, 12:06', and a blue notification message. The first notification states 'You are appointed as Approver in Lesson №274'. The second notification states 'You are appointed as Coordinator in Lesson Lesson 1'. Below each notification is a horizontal bar with interaction options: 'Нравится', 'Comment', 'Unfollow', 'More', 'CoPilot', and a view count '0'. At the bottom of each entry is a comment section with a user icon and an 'Add comment' button.

user A > user A  
Today, 12:06  
You are appointed as Approver in Lesson №274

Нравится Comment Unfollow More CoPilot 0

Add comment

user A > user A  
Today, 12:06  
You are appointed as Coordinator in Lesson Lesson 1

Нравится Comment Unfollow More CoPilot 0

Add comment

A Task on coordination / approval of lesson is automatically assigned to the coordinators and the approver in Bitrix24.
