Learning/Testing Assignments

Assignments to moderators are available in the moderator menu.

The main assignments page looks as follows:

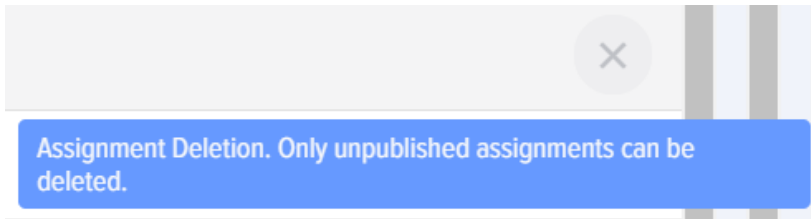

Contains three tabs:

- Program Assignments - where program assignments originate from;
- Program Results - contain the current progress and results of program completions;
- Assignments - where course/test assignments originate from.

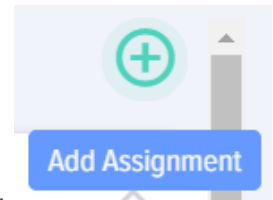

Program assignments

The program assignments tab contains current assignments and an element to create a new assignment.

Each assignment includes a delete element - a cross. However, you can only delete assignments that haven't been published.

Archive. An assignment can be moved to the archive, but you must first unpublish it.

Creating an Assignment. To create a new assignment, click on the plus sign.
