Events Catalog

The module "External/In-Person Events" is designed for planning, organizing, and accounting for external and in-person educational events.

The Events Catalog is presented in the main menu, accessible to all employees by default.

In the application settings (Settings - Other), you can hide the catalog. However, it will still be accessible to the application moderators.

The Events Catalog contains the following elements:

- Element for list update

- Type: list, cards.

- Element for adding an event.

An event card in the event catalog contains the following elements:

- Dates, title, and description of the event.

- transition to an event in the Bitrix calendar.

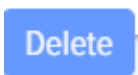

- event statuses.

- Apply to participate in the event.

- Edit the event. An event editing card opens.

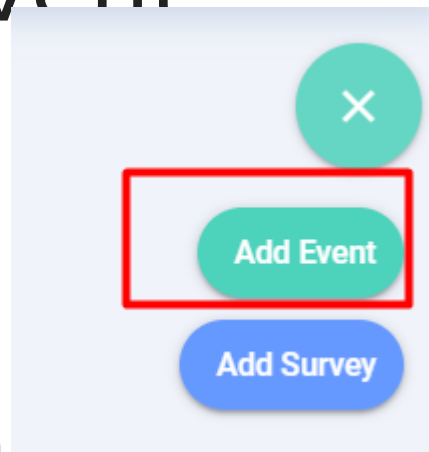

- Deleting an event.

-Export. When clicked, the event is automatically downloaded to the local machine in Excel format.

Creating an event

To create an event, click the "Add event" button a creation card will open for the event.

The event creation card contains the following fields and elements:

Field for entering the event title

Start and end of the event

Type

View

Type (internal, external) and type of event. An exhaustive list of developmental events is provided; if something is missing from the directory, write to us, and we will add it.

Event Description

Number of Participants. 0-...

0

-Participants. The list of participants is formed by the moderator. The list also includes employees who have independently submitted an application and have been approved by the moderator. The field "number of participants" allows you to set a participant limit. If the limit is exceeded, the employee submitting the application will receive a notification that the participant limit has been exceeded.

CLOSE

The application will be sent to the moderators, and after their approval, the event will appear in the general events catalog.

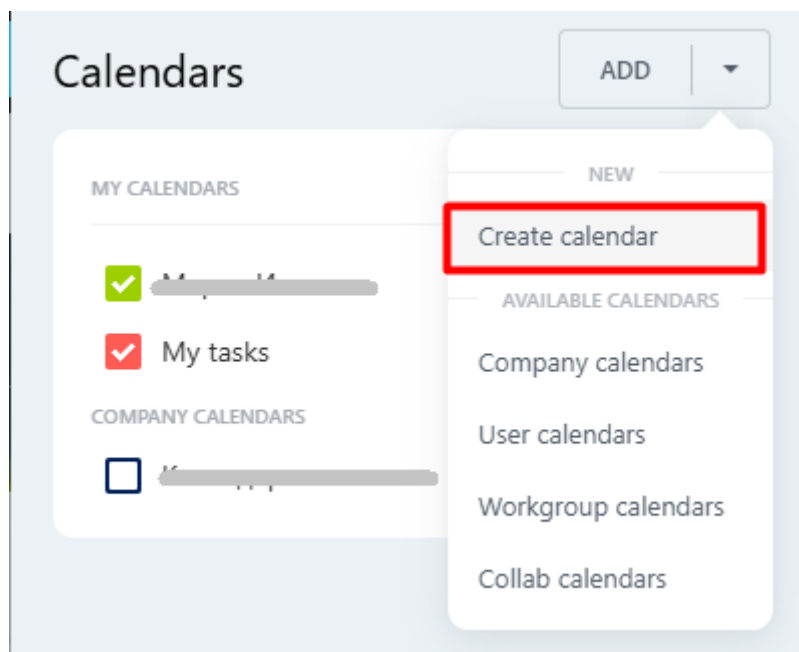

Calendar of in-person events, application collection, webinars

Using the built-in calendar and events functionality in Bitrix, you can organize a calendar of educational events.

Below is an example scenario for organizing such a system.

1. Create a separate calendar in Bitrix "Educational calendar"

Open the Calendar tab in the left menu, click on the Calendars button and Create calendar.

2. Create events in the Educational calendar. You can (standard event functionality in Bitrix) add to the event:

- Name;
- Description;
- Time;
- Venue;
- Set recurrence and other elements.

3. From the event itself, you can organize a video call. That is, organize a webinar. Video calls in Bitrix24 are not inferior to such services as Zoom, MS Teams. More details about the Video Calls service in the Bitrix24 application can be found at the link <https://helpdesk.bitrix24.com/open/12266982/>

4. After the event, you can collect a feedback questionnaire in the University application. Generate reports.

More details about the possibilities of the Bitrix calendar can be found at the link <https://helpdesk.bitrix24.com/section/47483/>
