

Adding a PDF Lesson

When you click on the "Add Lesson" element, the add lesson card opens. The add lesson card contains the following elements and fields:

- Lesson title - required field.
- Lesson description.
- Lesson logo.
- Select the thematic section.
- Next, create the lesson itself. It can be created in the following formats: a) Video b) SCORM c) PDF (e.g., presentations) d) Longread.

To add a lesson in PDF format, go to the "Main Educational Material" section, select "PDF Lesson," and upload the PDF file.

The screenshot displays a user profile interface. The top navigation bar includes a hamburger menu, the word "University", a "Quick Search" bar, and links for "COURSES-PROGRAMS", "TESTS", "EVENTS", and a settings gear. The left sidebar lists various user-related sections: Notifications, Profile (selected), My Rating, My Tests, My Courses, My Groups, My Assessments (with a red notification badge), My Reviews, My Certificates, My Competences, My Events, My Programs, and Individual. The main content area shows the following fields:

- Name:** [26] Name Test Surname
- Work Experience and Education:** A section header.
- Experience:** A text area with the placeholder "Your work experience in reverse chronological order".
- Education:** A text area with the placeholder "Completed educational institutions, courses, trainings with dates of study in reverse chronological order".
- External Certificates:** A section with an "Upload" button (labeled "IMG") and a note: "Select a file on your disk or drag it here, then click the 'Upload' button".

Revision #1
