

Adding a competency

Click the add item

Enter the competency name in the field

Enter Competence Name

Click on the plus - the competence will be added

Enter Competence Name

Soft skills

The added competence will look like this:

Soft skills

By default, competencies are created single-level, i.e. without manifestation indicators. To add manifestation indicators, activate this element:

In order for a competency to become available in other modules, it must be published.

To publish, click the next item
