

Logging in subaccounts to the application

If the settings are set to "Self-registration" (the administrator enters only Logins), then the first time the user logs in under the Bitrix24 account, the user will see the following pop-up window:

Authorization

Login

my_login1

Password

Repeat Password

Your Data

First Name

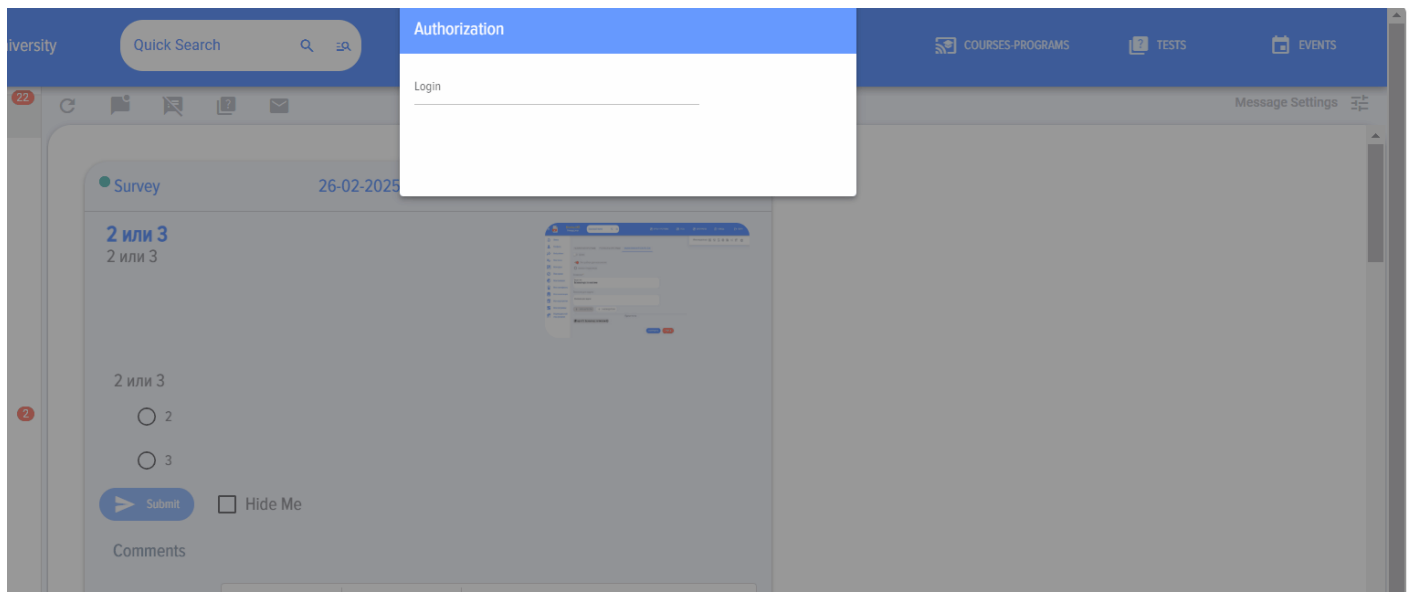

Middle Name

Last Name

Position

Passwords do not match

Save

When you next log in, it asks for login

A screenshot of the 'Authorization' modal. It has a blue header with the word 'Authorization' in white. Below the header, there is a 'Login' label and a single text input field for entering the login name.

If you enter your login and password correctly

A screenshot of the 'Authorization' modal. It has a blue header with the word 'Authorization' in white. Below the header, there are two input fields: the first is labeled 'Login' and contains the text 'my_login1'; the second is labeled 'Password' and has a password icon (an eye with a slash) to its right. A blue circular 'Login' button is located at the bottom right of the modal.

If the login is entered incorrectly:

Authorization

Login

111

Login not found, registration required

If the sub-accounts are created by the Administrator, then the following pop-up window will appear upon first login. You must create a password, all other data will already be filled in.

Authorization

Login

my_l_1

Password

Repeat Password

Your Data

First Name

AAA

Middle Name

BBB

Last Name
