

My reviews

The section is designed to check open questions in tests:

- If the test contains open questions (questions that require a free-form answer);
- An employee has been selected to check (responsible for) the answers to this question;
- The testee has answered the open question.

If the three conditions above are met, the employee will have a question and an answer to it in their personal account. The answer must be checked and graded.

You can only select two options:

- Correct
- Incorrect.

You can add a comment to the rating. The comment is visible in the test results in reports (to the moderator) and in the examiner's personal account.

You can switch and view the verified answer:

[SHOW CHECKED](#)

For more details, see the [Open Questions](#) section.

Revision #2
