

# Password reset

If a subaccount has forgotten its password, it can be reset using the following element:

The screenshot shows a table of subaccounts with columns for Login, First Name, Middle Name, Last Name, and Position. The first row contains the values 'my\_J\_1', 'AAA', 'BBB', 'CCC', and 'manager'. To the right of the 'manager' cell, there is a checkmark and a password field containing three asterisks, which is highlighted with a red square. Below the table, there is a blue notification bar that reads: 'The password will be cleared, and the user will need to enter it again upon login'. At the bottom left, there is a button labeled 'DELETE ALL SUBACCOUNTS'.

Login	First Name	Middle Name	Last Name	Position
my_J_1	AAA	BBB	CCC	manager

For the subaccount login, use only Latin letters and numbers.

DELETE ALL SUBACCOUNTS

The password will be cleared, and the user will need to enter it again upon login
